

SKILLINK

Key Features:

- Customer and worker registration and login
- Dashboard with service categories (Plumber, Cleaner, Electrician)
- Location-based search for nearby workers
- Profile view of workers with skills and reviews
- Booking system with photo upload, bid entry, and time selection
- Option for customers to cancel or reschedule bookings
- In-app chat between customer and worker
- Job completion feature with photo upload
- Rating and review system
- Emergency booking option for urgent help

Project Overview:

SkillLink is a mobile application that helps customers find and hire nearby service providers like plumbers, electricians, and cleaners. It connects people who need services with workers who are ready to work.

Objective:

The main goal of this project is to make it easy for customers to search, contact, and book local workers in case of regular or emergency needs. It also helps workers get more job opportunities in their area.

Technologies Used:

- Front End: Flutter/Dot
- Back End: Laravel
- DataBase: MySql
